Asocial personality.

## PROBLEM AREA (Include any factors, e.g., mental, family, drinking, etc., which may give clues as to the reason for his/her present offense, including his/her attitude toward the service. Add a concluding paragraph giving interview impressions)

Smathers was left to his own devices in earlier years, having no strong parental guidance. He does not like being told what to do because he feels this means that people are "looking down" on him. This appears to be his basic problem.

Impression: Smathers has the native ability to serve well. If he can be taught to control his temper, Smathers should be restored to duty.
